

Being Creative

Chaz Pugliese; Delta Teacher Development Series
ISBN 978 1 905085 33 0

Can we define 'creativity' in language teaching? This book is a brave attempt to capture the essence of this elusive concept, following the standard format for this series: theory, practice and development. A useful working definition is offered in Part A – producing ideas that are novel and have value. There is a wealth of ideas in the central section: some are slightly way-out, some are daunting and others are inspirational. Innovative.
